Summary

“Coding like poetry should be short and concise.” =>Santosh Kalwar

Do you think that self-learning can make a professional web developer able to create stunning websites?

I'm a web developer with two years of experience in developing small and large projects using various technologies and getting more experience, and I've helped several people create their websites.

If you'd like to work with a creative web developer, it's worth considering contacting me so we can work together and come up with the best product.

I'm also eager to find the right opportunity to work as a full-time developer in a company that values innovation and teamwork. Programming is not only my job but also my hobby, and I love working with other passionate developers who share the same vision.

Experience

MERN Stack Intern

كالبنيان المرصوص

Sep 2021 - Aug 2022 (1 year)
